

Q: When looking for a college and course, what should I look for?

A: How many hours are “pure” Kinesiology hours in relation to non-Kinesiology hours?

Are all Kinesiology units taught face to face? (VERY IMPORTANT)

Is the course accredited by the Australian Institute of Kinesiology and the Australian Kinesiology Association? Can you automatically join either of these associations once you receive your qualification?

Is the course nationally recognised by the Australian Training Authority?

Is it one type of Kinesiology for the whole course or are there many different types of Kinesiology? If there are many different types of Kinesiology there may be a lot of repetition as the techniques vary and are not integrated.

Can I still work while I am studying?

Is it Austudy approved?

Is there a lot of time for practice?
